DIAGNOSIS of the Body Composition
with patented Near-Infrared Light-Technology

"The evidence is overwhelming that obesity affects your health and life considerably"

(NIH: National Institute of Health).

The regular DIAGNOSIS of body composition, muscles, total body water content and the basal metabolic rate (Kcal) is the ideal, and proven recommended method which has been used for years by doctors to evaluate results for oriented professional nutritional and exercise programs.

The patented FUTREX® Near-Infrared Technology has been used for over 25 years, in the field of medical technology which has the highest accuracy and repeatability results. Through fast, exact and mobile measurements, the FUTREX® diagnostic systems are especially suitable for daily professional use with your clients and patients .

DATASHEET for FUTREX® Models

FUTREX® Models	FUTREX® 6300A/ZL	FUTREX® 6300/XL	FUTREX® 6055A/Pc	FUTREX® 6055/XPc
